President

March 13, 2015

Dear President,

As you know, EFOMP and the European Scientific Institute jointly founded the European School of Medical Physics (ESMP) in 1998. Because of concerns regarding the drop in the number of students from the major EU member states attending we felt that it was time to refresh the course structure and content while keeping those qualities that had made ESMP such a success in the past.

I am happy to inform you that this process is now well advanced and the new website of the ESMP is now on-line (<http://www.esi-archamps.eu/Thematic-Schools/ESMP>). ESMP will offer 6 courses during 2015 which can be taken separately or back-to-back. You can find important information about these courses on the website, i.e. course dates, course aims, learning objectives, course coordinators etc. Additional content such as enrolment fees and opportunities for bursaries will be added progressively. Please note that on-line registration for 2015 courses will open on March 30, 2015.

The future success of ESMP success depends on many factors but it is most important that medical physicists are made aware of it and that we promote the school widely amongst our members. So I would kindly ask you to advertise ESMP and inform your members about the new website and the 2015 courses.

With best wishes,

Prof. John Damilakis
EFOMP President
